Oxygen Equipment Cases And Airway Management Kits

Emergency Responder

Moulded Plastic Carrying Case

A rugged performer that allows full access to your oxygen therapy and resuscitation equipment.

Designed to accommodate a "D" or "Jumbo D" oxygen cylinder and Statvac II Oxygen Powered Aspirator, the Emergency Responder is ready for any breathing emergency.

The Emergency Responder comes standard with a moulded transport hole in the end of the case to allow an oxygen mask or oxygen powered resuscitator to be used during transport with the lid of the case in a closed position.

Clamshell Carrying Case

The safe way to transport your oxygen therapy kit and supplies. The clamshell design allows the kit to be completely opened its entire length for easy access to all your emergency equipment.

Additional storage for your respiratory accessories is easily accommodated by the large elastic top pouches along the inner wall. Large loop handles and adjustable

shoulder strap allows hands free operation during transport.

ATV Ambulance Bracket

Manufactured to stringent International Crash Test Standards, this mounting bracket allows the CAREvent® ATV+ or MRI ventilators to be mounted on the wall or ceiling of any ambulance or aircraft.

Airway Management Kit

Semi-rigid oxygen therapy and resuscitation system that organizes your oxygen cylinder and regulator, resuscitator, oxygen powered aspirator and emergency airway management equipment. Large Top and side-

opening main compartment with large accessory pouches that allows the lid to be fully opened for quick and easy access. The large Central compartment with adjustable oxygen

cylinder straps to accommodate a range of cylinder sizes and styles. The end pocket has been specially designed to hold and operate an oxygen powered suction unit with accessories. Hidden adjustable backpack straps allow hands free operation during transport.

Automatic Transport Ventilator Case

The best way for you to store, protect and carry your CAREvent® series of Transport Ventilators while transporting a critically ill patient.

Hands-free transport is easily accomplished by hanging the case over the rails of a stretcher or hospital bed. It features an easy open large zippered top and front lid. The lid also contains a removable accessory pouch that can accommodate your ventilator respiratory accessories.

MRI Stand and Mounting Bracket

Designed for use within the MRI environment, this mounting bracket and stand allows the CAREvent® MRI ventilator to be used within the MRI suite. The stand can also be used to mount the CAREvent® ATV or MRI for use anywhere in the hospital making it easy to move around with the patient
