

O-Two CPR Personal Protection Devices

Bacterial and viral protection during training and CPR

O-Two Rescue Breather CPR Pocket Ventilator

The O-Two Rescue Breather CPR pocket ventilator provides the rescuer with a safe and effective means to perform life-saving expired air resuscitation while offering maximum protection from the potential risks of disease transfer for both the patient and the rescuer.

The O-Two Rescue Breather CPR pocket ventilator comes standard with a low-resistance disposable one-way valve, with bacterial/viral filter, oxygen inlet, head-strap and carrying case. The filter ensures optimum bacterial protection, yet minimum airway resistance. The seamless air cushion mask eliminates seam failures and air loss during storage.

The compact size of the O-Two Rescue Breather CPR pocket ventilator allows it to fit into your pocket, purse, brief case, sports bag or glove compartment of your car — ready for any breathing emergency.

Features

Transparent universal cushion

Mask for adults to infants

Replaceable, clear, one-way valve with bacterial/viral filter

Oxygen inlet with protective cap

Head-strap

Compact, clamshell case with hold tabs
