

Rescue Breather CPR Protective Barrier

BACTERIAL AND VIRAL PROTECTION DURING CPR TRAINING

The single-use O-Two Rescue Breather CPR protective barrier is ready when you need it. Designed as a first-response device for use during CPR, the O-Two Rescue Breather provides a physical barrier between the rescuer and the patient. This single-use, cost-effective quality device provides rescuer protection by the use of a one-way flapper valve and filter to reduce the risk of crosscontamination.

Compact and lightweight, the O-Two Rescue Breather can be easily stored in first aid kits, purses, sports bags and glove compartments. Packaged complete with instructions in a clear polyethylene Ziploc® bag, the O-Two Rescue Breather is also available in a keychain pouch or a key chain/belt pouch complete with a pair of gloves, ensuring that you will always carry the level of protection you deserve when helping to save a life.
