

News Release

O-Two Medical Technologies Partners with the Province of Ontario

April 1, 2020,
Brampton, Ontario

O-Two Medical has partnered with the Province of Ontario to manufacture 10,000 ventilators to equip doctors fighting the COVID-19 crisis. With the support of Canada's largest automotive suppliers, we will make sure that this important life-saving equipment gets into the hands of the healthcare professionals who need it now.

The entire team at O-Two is dedicated to fulfilling this historic undertaking around the clock. Mitigating the risk of contamination is paramount to achieving this goal. As such will not be doing media interviews at this time. We sincerely hope you understand, we are all in this together.

All inquiries should be forwarded to resuscitation@otwo.com

About O-Two Medical

Since 1971 O-Two Medical Technologies has produced state-of-the-art products for the provision of Emergency Respiratory Care and Inhalation Analgesia.

Exporting to over 60 countries and possessing more than 40 patents worldwide, we offer solutions in Automatic and Manual Ventilation, Inhalation Analgesia and Oxygen Administration. Our manufacturing and research-and-development facilities are registered to the ISO 13485 Quality system (MDSAP) as well as Health Canada (HC), European (CE) and US (FDA) medical device requirements.
