

# O-Two Carrying Cases and Mounting Brackets

### ESERIES AUTOMATIC TRANSPORT VENTILATOR CARRYING CASE

Semi-rigid bag that organizes your automatic transport ventilator, oxygen circuit and hose, power cables and extra batteries.

Large bottom and front-opening main compartment and 2 large accessory pouches on the sides allow the lid to be fully opened for quick and easy access to connections and battery. The large central compartment has velcro opening to access the ventilator if needed. Adjustable shoulder strap plus eyekets in the back to connect the ventilator mount.

### EMERGENCY RESPONDER MOLDED PLASTIC CARRYING CASE

A rugged performer that allows full access to your oxygen therapy and resuscitation equipment. Designed to accommodate a "D" or "Jumbo D" oxygen cylinder and O-Two Statvac® II oxygen powered aspirator, the emergency responder is ready for any breathing emergency.

The emergency responder comes standard with a molded transport hole in the end of the case to allow an oxygen mask or oxygen-powered resuscitator to be used during transport with the lid of the case in a closed position.

### CLAMSHELL CARRYING CASE

The safe way to transport your oxygen therapy kit and supplies. The clamshell design allows the kit to be completely opened along its entire length for easy access to all your emergency equipment.

Additional storage for your respiratory accessories is easily accommodated by the large elastic top pouches along the inner wall. Large loop handles and adjustable shoulder strap allows hands free operation during transport.

### ATV AMBULANCE BRACKET

Manufactured to stringent international crash test standards, this mounting bracket allows the O-Two CAREvent® ATV+ or MRI ventilators to be mounted on the wall or ceiling of any ambulance or aircraft

### ESERIES "SMART MOUNT" BRACKET

Manufactured specifically for the eSeries ventilator range, this mounting bracket allows the ventilators to be mounted on an ambulance cot, hospital stretcher or roll stand.
